All Y11 students should be aware of the resources they can use to revise for their maths GCSE.

Below is a checklist of things they should be doing over the Easter period.

1. Completing the booster pack tasks on MyMaths . All students should know their log-in details. If they do not then please see their maths teacher before the Easter break.

11Alk, Ban, Eul complete booster packs for grades 6, 7, 8 & 9 (should complete 5 if needed)

11Can and Fer complete booster packs for grades 4, 5, 6, 7 (should complete 3 if needed)

11Dri and Gor complete booster packs for grades 3, 4, 5

2. All students to complete Practice Paper 6 (A5 booklet containing 3 papers). The expectation is for all students to complete and hand in first lesson back so that their teacher can collect check and mark. From this, a paper analysis will be completed which will give all students the topics they are strong at and those that require more practise. Students should then be using resources (mathswatch, mymaths etc) to revise over these areas to close their knowledge gap.
3. Students should complete the problem solving packs located on Fronter on the Y11 page under the "general revision resources" table. These packs are divided into units that are the same as the book and contain thought provoking questions within that unit e.g. unit 12H are problem solving questions to unit 12 in the higher book.

Please note: If your mathswatch doesn't log in and the first letter and surname are common for example **Daniel Malik** then your username may be **DMalik1@ina**; you will need to check with your maths teacher to confirm.

Final message from the maths team; the best way to revise maths...is to do maths.
