

Psychology year 12 summer independent learning task

Your summer task is to research a famous psychologist from a particular field in Psychology. These individuals, and their respective fields of study, are:

Adrian Raine- Biological Psychology (aggression/ criminality)

Edward Thorndike- Behaviourism

Albert Bandura- Social Learning Theory

Albert Ellis- Cognitive Psychology

Sigmund Freud- Psychodynamic Psychology

Abraham Maslow- Humanistic Psychology

You will need to write a brief, hand written, summary (no more than 300- 500 words) describing the main ideas or contributions of each individual to the field of Psychology. You may either write a summary describing, briefly, the different theories each Psychologist has proposed or studies they have conducted; or you may to describe one particular study or theory in more detail.
