

Summer IL for year 11 Geography

- Bring UK's physical and geology map
- What are the characteristics of igneous, sedimentary and metamorphic rocks? Write 2 for each type.
- How are coastal landforms formed by erosion and deposition? Draw annotated, well-labelled diagrams for both.
- Research and make notes on causes, effects and management of floods in Somerset.
- Learn to read OS maps; How to identify rivers, coasts, landforms, read height above sea level, understanding scale

- **There will be quizzes on edmodo to recap learning from year 10, which you are expected to complete by 31st August 2017. If you don't know your username and password you must see your geography teacher to sort this out before summer break.**
